Our bespoke insoles

Help ease and treat your patients' foot conditions

LFT offers foot specialists complete solutions for analysing and treating foot conditions. So that your patients get the perfect custom-fit insoles that will help ease, even eliminate, their foot conditions. Our custom-fit insoles constitute **step 4** within this complete solution.

High comfort level

At LFT, we make custom-fit insoles to prevent, support or correct foot conditions. We strive to create a high level of comfort for patients by offering better options.

Our Insoles

Applications of our insoles

As foot specialist, you can use our custom insoles for:

- patients with medical conditions such as diabetes, rheumatoid arthritis and plantar fasciitis;
- athletic patients who run, play tennis or football;
- patients who wear work and safety shoes that require certification.

Over one hundred combinations of materials based on MemoFlex, cork, ESD and multi-layer shore combinations, with or without a BaseFlex or MemoFlex underlay.

Extensive range of materials

LFT has an extensive range of materials for the production of custom insoles. To produce the insoles, you can easily add extra podotherapeutic, podological or orthopedic elements to the desired insole. Moreover, we have developed over one hundred combinations of materials based on MemoFlex, cork, ESD and multi-layer shore combinations, with or without a BaseFlex or MemoFlex underlay.

MemoFlex milling blocks

MemoFlex, the name speaks for itself: 'memory' and 'flexibility'. Thanks to its high memory properties, the material retains its original shape for long, while its flexibility lends itself to pliable and smooth CAD/CAM manufacturing. MemoFlex is a high-quality material for professionals who only want the best for their patients. Thanks to the closed, cross-linked cell structure, MemoFlex is the new standard in CAD/CAM manufacturing. MemoFlex can be used in all types and brands of milling machines.

Thanks to the closed, cross-linked cell structure, MemoFlex is the new standard in milling blocks. MemoFlex can be used in all types and brands of milling machines.

2.700.000.000

steps and counting with our insoles
